Manage Tasks

Create a simple Laravel application that allows users to create, read, update, and delete tasks.

The application should use the following technologies:

- Laravel
- MySQL
- Bootstrap

The application should have the following features:

1. A user registration and login system
2. A task list that allows users to create, read, update, and delete tasks
3. A task detail view that shows the task title, description, due date, and status
4. A task search feature that allows users to search for tasks by title, description, or due date
5. Every User can view and edit his own tasks only.
6. Create a super admin user that can view all tasks and edit on them.

The application should be well-designed and easy to use.(you can use a ready admin panel Like coreui.io or adminlte.io)
